## **Simultaneous Labia Minora and Majora Reduction: A Case Report**

John R. Miklos, MD\*, and Robert D. Moore, DO

*From Atlanta Urogynecology Associates, Atlanta, Georgia (both authors).*

---

**ABSTRACT** Labia minora enlargement may constitute a cosmetic or functional problem for a woman, potentially leading to surgery. However, more rarely, the labia majora may also be problematic for women. This case describes the rare situation of a woman presenting with enlargement of both the labia minora and majora and her subsequent simultaneous surgical treatment. *Journal of Minimally Invasive Gynecology* (2011) 18, 378–380 © 2011 AAGL.
